How can I prevent RFID signal tracking?

2020/12/20

Hello Rene! Radio Frequency ID is such tiny electronic thing that is implanted in the hand of the patient for doctors to be able to track his or her location by means of electronic tracking. While this technology might seem quite useful to monitor the location and track down unstable patients with possible mental issues, for example, it can also bring danger to you. Looking at your question I guess you Rene have some troubles of such manner. I don't know exactly why do you need to get rid of that kind of tracking but considering the fact that I hate personal freedom intrusions I would tell you how can you do that. In order to break free from tyranny of RFID tracking you need to use RFID jammers which can block all signals of RFID tracking device under your skin. Be safe, be healthy and never let someone track you down with no reason!

diy cell phone signal jammer
